

Labour Friends of Poland

Reasons to Vote Labour in the May 3rd Elections

Fair Pay

Labour guaranteed migrant workers the minimum wage, and made sure it has been updated each year.

Conservatives opposed the introduction of the minimum wage in the UK. Even now some leading Conservatives are campaigning for it to be scrapped.

Community

Labour is working with Trade Unions and local Labour Councils to help integrate Polish workers and their families into life in Britain

Fighting Exploitation

Labour protected migrant workers from exploitation by illegal gangmasters. Labour legislation has meant an end to 'middlemen' recruiting workers (often migrants) to work in unsafe conditions and with exploitation pay.

Free Movement

Labour championed Poland's entry into the EU and NATO, and supported the rights of Poles to work in the UK.

The Conservatives Aren't on Your Side

- Many Conservatives want to get out of the European Union all together, meaning Polish workers would either be sent home or would have extremely reduced rights in the UK
- The Conservatives opposed Labour's protections for migrant workers and are trying to roll them back
- The Conservatives currently sit with far-right parties- including Jaroslaw Kaczynski's PIS and the Czech far-right party ODS in the European Parliament

About Labour Friends of Poland

Labour Friends of Poland (LFP) is an organisation designed to improve communication between the UK Polish community and the Labour Party. The aims of the group are:

- To encourage more members of Britain's Polish community to get involved in the Labour Party and participate actively in UK political life.
- To promote greater debate and education on Polish matters and to celebrate the positive contribution of Britain's Polish population to national life.
- To provide a forum for the discussion, debate and formulation of policy on matters affecting the UK Polish community.

On May 3rd, vote for a party that stands up for workers across Europe
